Practically all the action—and there is a world of it—takes place at sea. The adventures will appear personal to you. So—

If you don't mind being shanghaied with a young San Francisco newspaperman; if you'd enjoy a gold-hunting expedition to the Arctic in a stout sealing ship manned by a Bolshevik crew of sailors and seal hunters, captained by the girl's father, and financed by the smoothest villain you ever met—then you'll have a wonderful time with "A Man to His Mate."

During the recent storm, another of the big trees on the north side of the courthouse square was blown down. It was one of four which up to a few years ago formed a row along that side of the square. All four of these trees were rotten at their hearts; one went down in a storm two or three years ago, and Tuesday another followed it. It's only a matter of time before the other two are broken down, and as they stand they are a menace. The county commissioners should have them cut down and healthy trees set out in their places.

Not the least of the improvements to the city recently is the new arrangement of the lights over the faces of the courthouse clock. These lights now cast their rays directly on the figures, and not only the people in town but some distance out in the country can see them. The lights also make an additional illumination to our already well lit up public square.
